“Let food be thy medicine and medicine be thy food” - Hippocrates famous quote, — which we translated to “food is medicine” and use as our motto. We have been taught for thousands of years that food is medicine and a healthy diet is a powerful tool for protecting one’s health. Foods provide us with energy (calories), but they do much more than that. The foods you include in your diet also play a critical role in controlling inflammation levels, balancing blood sugar, regulating cardiovascular health (including blood pressure and cholesterol levels), helping the digestive organs to process and eliminate waste, and much, much more.

Although we do have a seemingly endless supply of medicines today, we can still heal some of our ailments through natural means. The power of natural healing has not dulled simply because of medical advancement, and in some cases, natural remedies may be even more effective. For instance, with natural healing, we don’t have to worry about harmful side effects that often accompany some of the harsh chemicals in modern medicine. Furthermore, rather than simply treating symptoms, natural elements heal by purifying us from the inside out, perhaps ultimately resulting in a greater quality of life.

“Project LAST-RITE” a wood saver, eco-friendly, easy to use - Improved Wood Based Cremation System – with association of Swarahantra, has been awarded 6 programs (2 in UP & 4 in UttraKhand) to establish & implement the units. At Uttrakhand by A. K. Gupta & Co. along with Paradise Constructions , at Uttar Pradesh by Noida Authority, WC-9, along with M/S Jyoti Singh.

This is a eco-friendly way to cremate a dead body with **wood Consumption approximately 25% (110 Kg)**, which can fulfill the need of recent problem associated with the dead body cremation in INDIA. In this **all the rituals followed by Hinduism, Sikhism, Jainism etc. can be fulfilled. KAPAL KRIYA CAN ALSO BE PERFORM.**

It is designed in such a way so that maximum heat evolve from the burning of wood is utilized for cremation of the dead body (i.e. **Maximum Combustion Efficiency**) and air input is as per requirement for complete combustion & controlled so that less suspended particles in Flue gas.
